Contents of Volume 20

Number 1, January 1977

MICHEL NIEL, CHRISTIAN CROS, MICHEL POUCHARD, ET JEAN-PIERRE CHAMINADE. Contribution a l'Étude des Propriétés Magnétiques des Phases AVX_3 (A = Rb, Cs; X = Cl, Br, I) 1

B. O. LOOPSTRA, J. C. TAYLOR, AND A. B. WAUGH. Neutron Powder Profile Studies of the Gamma Uranium Trioxide Phases 9

A. MEERSCHAUT, P. PALVADEAU, ET J. ROUXEL. Preparation et Structure Cristalline de $I_{0.33}NbSe_4(I_4Nb_{12}Se_{48})$ 21

BORIS BRACH, IAN E. GREY, AND CHRISTINA LI. Phase Equilibria in the System V_2O_3–Ti_2O_3–TiO_2 at 1473°K 29

J. F. BAUMARD, D. PANIS, AND A. M. ANTHONY. A Study of Ti–O System between Ti_3O_5 and TiO_2 at High Temperature by Means of Electrical Resistivity 43

M. SHARON AND ANJAN KUMAR KALIA. Conduction and Tritium Diffusion Studies in Single Crystals of Potassium Hydrogen Sulfate 53

G. BLASSE, A. W. M. BRAAM, AND M. HEERSCHOP. Influence of Crystal Structure on the Luminescence of Ions with s^2 Configuration 63

IWAMI HIGASHI, TOSIO SAKURAI, AND TETSUZO ATODA. Crystal Structure of α-AlB_{12} 67

K. T. JACOB AND C. B. ALCOCK. Activities and Their Relation to Cation Distribution in $NiAl_2O_4$–$MgAl_2O_4$ Spinel Solid Solutions 79

C. J. WRIGHT. Inelastic Neutron Scattering Spectra of the Hydrogen Tungsten Bronze $H_{0.4}WO_3$ 89

A. F. ANDRESEN, A. J. MAELAND, AND D. SLOTFELDT-ELLINGSEN. Calcium Hydride and Deuteride Studied by Neutron Diffraction and NMR 93

M. A. BEG AND S. M. ANSARI. Kinetics and Mechanism of Reaction between Mercuric Bromide and Silver Iodide in Solid State 103

Number 2, February 1977

W. L. ROTH AND R. C. DEVRIES. Comparison of the Thermal Stability of β- and β''-Alumina at High Pressures 111

V. A. LEVITSKI, P. B. NARCHUK, JU. HEKIMOV, AND JA. I. GERASSIMOV. Thermodynamic Study of Some Solid Solutions in the CaO–ZrO_2 System by emf Method 119

JAN-OLOV BOVIN AND STEN ANDERSSON. Swinging Twinning on the Unit Cell Level as a Structure-Building Operation in the Solid State 127

G. BOCQUILLON, C. CHATEAU, C. LORIERS, AND J. LORIERS. Polymorphism under Pressure of the Disilicates of the Heavier Lanthanoids $Ln_2Si_2O_7$ (Ln = Tm, Yb, Lu) 135

J. H. W. DE WIT. Structural Aspects and Defect Chemistry in In_2O_3 143

D. FISHER, D. M. CHISDES, AND TED B. FLANAGAN. Solution of Hydrogen in Palladium/Copper Alloys 149

J. SŁOCZYŃSKI. Kinetics and Mechanisms of Synthesis of Cobalt Telluromolybdate $Co_4TeMo_3O_{16}$ 159

M. INAGAKI, T. OZEKI, H. FURUHASHI, AND S. NAKA. Solid Solubility and Cation Distribution in the System Co_2GeO_4–Mg_2GeO_4 169

J. EVERS, G. OEHLINGER, AND ARMIN WEISS. Effect of Pressure on the Structures of Divalent Metal Disilicides MSi_2 (M = Ca, Eu, Sr) 173

H. D. LUTZ UND W. BECKER. Festkörperreaktionen in Chalkogenidsystemem. V. Verteilungsgleichgewichte zweiwertiger Übergangsmetalle in Chromthiospinell-Mischkristallen 183

R. P. RASTOGI, N. B. SINGH, AND R. P. SINGH. Organic Solid-State Reactions 191

CHARLES T. PERRINO AND JAMIE VAN DE VEN. An Electrolysis and Conductivity Study on Ammonium Dihydrogen Arsenate 201

L. E. CONROY AND A. NØRLUND CHRISTENSEN. Preparation and Crystal Structure of β-Ta_2N 205

NOTES

S. GELLER. On the Structure of β-Ga_2O_3 209

J. C. PHILLIPS. Phason and Metal-Insulator Domain Walls in TTF-TCNQ 211

G. BLASSE. Vibrational Frequencies and Pauling's Electrostatic Valence Rule 217

Number 3, March 1977

A. F. REID, C. LI, AND A. E. RINGWOOD. High-Pressure Silicate Pyrochlores, $Sc_2Si_2O_7$ and $In_2Si_2O_7$ 219

J. JOUGLAR, P. L. VUILLERMOZ, ET A. LAUGIER. Influence de la Non Stoechiometrie sur les Interactions Phonons-Dislocations dans GaAs:Te 227

TETSURŌ NAKAMURA AND JIN-HO CHOY. Determination of Ionic Valency Pairs via Lattice Constants in Ordered Perovskites (Ala)($Mn^{2+}Mo^{5+}$)O_6 (A = Ba, Sr, Ca) with Applications to (ALa)($Fe^{3+}Mo^{4+}$)O_6,$Ba_2(Bi^{3+}Bi5^{+})O_6$ and $Ba_2(Bi^{3+}Sb^{5+})O_6$ . . . 233

L. B. HARRIS. Inhomogeneous Transport at Low Temperatures in Alkali Halide Crystals 245

DAN MCLACHLAN AND WILFRID R. FOSTER. The Relationship between Coefficients of Expansion and Heat Capacities of Simple Metals 257

Y. Takeda, M. Sone, Y. Suwa, M. Inagaki, and S. Naka. Synthesis of Fluoride Garnets $\{Na_3\}[M_2^{3+}](Li_3)F_{12}$ (M = Al, Cr, and Fe) from Aqueous Solution and Their Properties 261

D. Olivier, J. C. Vedrine, et H. Pezerat. Application de la RPE à la localisation des Substitutions isomorphiques dans les micas: Localisation du Fe^{3+} dans les muscovites et les phlogopites 267

J. S. Kasper, M. Vlasse, and R. Naslain. The α-AlB_{12} Structure 281

Toshihide Tsuji, Arthur T. Howe, and Norman N. Greenwood. The Fe–Se System. II. Mössbauer Diffusional Line-Broadening Studies of $Fe_{1+x}Se_2$ ($x \sim 0.5$, i.e., $Fe_{\sim 3}Se_4$) 287

L. Svob and C. Grattepain. Low-Temperature Diffusion of Lithium in CdTe 297

W. Weppner. Electronic Transport Properties and Electrically Induced p–n Junction in ZrO_2 + 10m/o Y_2O_3 305

F. Bonino, M. Lazzari, A. Lonardi, B. Rivolta, and B. Scrosati. Physicochemical Investigation of the Silver Iodide–Silver Polymolybdate Systems in the Solid State 315

M. Inagaki, A. Nakanishi, Y. Takeda, and S. Naka. Effect of Atmosphere on the Formation of Spinel Solid Solutions in $Mn_2SnO_4 - Mn_3O_4$ System 323

Note

AUTHOR INDEX FOR VOLUME 20 423

The Subject Index for Volume 20 will appear in the December 1977 issue as part of a cumulative index for the year 1977.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Contributions in Russian are acceptable, but they will be translated into English before publication. Manuscripts should be submitted to the Editor M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters ($^{a, b, c}$). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS c/o Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, New York 10017. Remit in advance for each NAPS Accession number. Institutions and organizations may use purchase orders when ordering, however, there is a billing charge for this service. Make checks payable to Microfiche Publications. Photocopies are $5.00. Microfiche are $3.00. Outside of the U.S. and Canada, postage is $3.00 for a photocopy or $1.50 for a fiche.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after a reduction of 50%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and the figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten, with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
